SUPPLIER-MANAGED INVENTORY (SMI)

Our award-winning SMI programs are the quickest and most efficient way to deliver product and keep your production line up and running.

Spirit works closely with you to understand your MRP and planning. We manage your supply chain to fill your pipeline months in advance with the parts, services, and quality delivery.

- Realize supply chain efficiency, reduced impact from allocation and product shortages, and reduced cost because we monitor your pipeline, warehouse and protect your product, and perform testing and inspection for you.
- Receive real-time reporting, manage backlog, and track components with our robust ERP system.
- Avoid overstock and min/mult quantity restrictions. Spirit packages and splits quantities to your needs.
- In-house receiving inspection, quality inspection, extended XRF analysis, up-screening, and packaging.
- Customer on-site consignment warehousing available.
